RSF

 **MADE IN CANADA**

#1 Focus SBR

HEAT
50,000 BTU

EMISSIONS
1.4 g/h

FIREBOX
2.6 cu ft

LOGS
22 in

AREA
1,000–2,000 sq ft

NOTES
Smart BurnRate · 75% LHV · gravity heat
dump

We picked the Focus SBR because Smart BurnRate makes a serious heater easy to live with. RSF's gravity heat dump sends warmth to a second room, 75% LHV, from a 2.6 cubic-foot box that takes 22-inch logs. The fireplace we wrap in Masonal.

icc-rsf.com/fireplace/rsf/focus-sbr/

PACIFIC ENERGY

 **MADE IN CANADA**

#2 FP30 LE

HEAT
99,000 BTU

EMISSIONS
1.7 g/h

FIREBOX
3.0 cu ft

LOGS
20 in

AREA
up to 3,000 sq ft

NOTES
Largest PE zero-clearance · EBT · floating
firebox · Duncan, BC

We picked the FP30 LE when the great room has to heat the house. Pacific Energy, 99,000 BTU, 3.0 cubic feet, 20-inch logs, Extended Burn Technology, floating firebox with a lifetime warranty. Canadian steel from Duncan.

www.pacificenergy.net/products/fp30-le-zero-clearance-wood-burning-fireplace/

PACIFIC ENERGY

 **MADE IN CANADA**

#3 FP25 Arch LE

HEAT
72,000 BTU

EMISSIONS
1.4 g/h

FIREBOX
2.1 cu ft

LOGS
18 in

AREA
up to 2,000 sq ft

NOTES
Arched cast door · EBT · dual blowers ·
Duncan, BC

We picked the FP25 Arch when the opening should still read as a fireplace with a door. Pacific Energy arched cast iron, 72,000 BTU, floating firebox, Extended Burn Technology. Same Duncan shop as the FP30.

www.pacificenergy.net/products/fp25-le-zero-clearance-wood-burning-fireplace/

RSF

 **MADE IN CANADA**

#4 Opel 3 Plus

HEAT
70,000 BTU

EMISSIONS
0.7 g/h

FIREBOX
3.6 cu ft

LOGS
20 in

AREA
1,200–2,400 sq ft

NOTES
Catalytic · overnight burns in a built-in

We picked the Opel 3 Plus when they want overnight catalytic heat in a built-in, not a stove in the middle of the room. RSF certifies 0.7 g/h, 3.6 cubic feet, 70,000 BTU, 80% LHV.

icc-rsf.com/fireplace/rsf/opel-3-plus/

VENTIS

 **MADE IN CANADA**

#5 HE275CF

HEAT
80,000 BTU

EMISSIONS
1.2 g/h

FIREBOX
2.5 cu ft

LOGS
20 in

AREA
750–2,200 sq ft

NOTES
Contemporary single door · 1.2 g/h

We picked the HE275CF for a clean contemporary face on a real heater. Ventis lists 80,000 BTU, 1.2 g/h, and a single-door firebox at 2.5 cubic feet — a modern look that still heats 750–2,200 square feet.

coval.ca/on/product/he275cf-wood-fireplace-ventis/

HEAT & GLO

#6 Northstar

HEAT
68,200 BTU

EMISSIONS
1.8 g/h

FIREBOX
2.7 cu ft

LOGS
22 in

AREA
1,000–2,600 sq ft

NOTES
Cast-iron cabinet doors · EPA 2020 · 76%
· 10-hour burns · Lakeville, MN

We picked the Northstar because it is the double-door wood fireplace. Heat & Glo, cast-iron cabinet doors, 68,200 BTU, 2.7 cubic feet, 22-inch logs, 1.8 g/h, ten-hour burns. EPA 2020, listed for Canada. Built in Minnesota, not Canada — the doors are why it is in this section.

www.heatnglo.com/fireplaces/wood/indoor/northstar-wood-fireplace

BLAZE KING

 **MADE IN CANADA**

#1 Princess 32

HEAT
42,000 BTU

EMISSIONS
0.4 g/h

FIREBOX
2.75 cu ft

LOGS
18 in

AREA
up to 3,000 sq ft

NOTES
Catalytic · up to 40-hour burns ·
thermostat

We picked the Princess 32 because it is the overnight stove. Blaze King catalytic, 0.4 g/h, thermostat that holds a house without babysitting the fire. Forty-hour burns when you load it right. The Northern Ontario wood stove.

blazeking.com/princess-32/

VENTIS

 **MADE IN CANADA**

#2 HES350

HEAT
110,000 BTU

EMISSIONS
1.32 g/h

FIREBOX
3.5 cu ft

LOGS
22 in

AREA
1,000–2,700 sq ft

NOTES
Non-catalytic · 77% · 10-hour burns · ash
pan · Quebec

We picked the HES350 when the stove has to heat a big Northern Ontario house, not a cabin. Ventis, Quebec, 110,000 BTU, 3.5 cubic feet, 22-inch logs, 1.32 g/h, ten-hour burns. Non-catalytic, cast door, ash pan.

coval.ca/on/product/hes350-wood-stove-ventis/

VERMONT CASTINGS

#3 Defiant

HEAT
56,000 BTU

EMISSIONS
1.3 g/h

FIREBOX
3.25 cu ft

LOGS
24 in

AREA
1,300–2,800 sq ft

NOTES
Vermont foundry · catalytic · top load ·
14-hour burns

We picked the Defiant because it is the foundry stove. Vermont Castings, cast in Vermont, 56,000 BTU, 3.25 cubic feet, top-load so the smoke stays in the box. Same Forge & Flame house as Heat & Glo. Doors that still look like 1975, heat that holds a farmhouse.

forgenflame.com/products/vermont-castings-defiant-wood-stove

PACIFIC ENERGY

 **MADE IN CANADA**

#4 Super LE

HEAT
72,000 BTU

EMISSIONS
1.8 g/h

FIREBOX
2.1 cu ft

LOGS
18 in

AREA
up to 2,000 sq ft

NOTES
Most popular PE stove · catalytic-free ·
EBT · Duncan, BC

We picked the Super LE as the Canadian workhorse. Pacific Energy, 72,000 BTU, catalytic-free, Extended Burn Technology, lifetime firebox. The stove Duncan has been building for forty years.

www.pacificenergy.net/products/

VERMONT CASTINGS

#5 Encore

HEAT
48,000 BTU

EMISSIONS
1.1 g/h

FIREBOX
2.3 cu ft

LOGS
22 in

AREA
up to 1,800 sq ft

NOTES
Vermont foundry · FlexBurn catalytic · top
load

We picked the Encore as the smaller foundry stove. Vermont Castings, 48,000 BTU, 1.1 g/h catalytic, top load, 22-inch logs. Same doors as the Defiant, sized for a living room instead of a great room.

forgenflame.com/products/vermont-castings-encore-wood-stove

BLAZE KING

 **MADE IN CANADA**

#1 Princess 29 Insert

HEAT
38,000 BTU

EMISSIONS
0.9 g/h

FIREBOX
2.5 cu ft

LOGS
16 in

AREA
existing masonry

NOTES
Catalytic insert · thermostat · overnight in
a hole

We picked the Princess 29 Insert to put Blaze King overnight heat in a dead masonry box. Catalytic, thermostat, 0.9 g/h. The retrofit that still holds a house.

blazeking.com/

VENTIS

 **MADE IN CANADA**

#2 HEI350

HEAT
110,000 BTU

EMISSIONS
1.32 g/h

FIREBOX
3.5 cu ft

LOGS
22 in

AREA
1,000–2,700 sq ft

NOTES
Blower included · cast door · 77% · min.
opening 26¼ × 31 in · Quebec

We picked the HEI350 for a dead masonry box that still has to heat the house. Same Ventis firebox as the HES350 — 110,000 BTU, 3.5 cubic feet, 22-inch logs, 1.32 g/h — with the blower already in the box. Quebec.

coval.ca/on/product/hei350-wood-insert-ventis/

VERMONT CASTINGS

#3 Montpelier II

HEAT
56,000 BTU

EMISSIONS
1.85 g/h

FIREBOX
2.4 cu ft

LOGS
20 in

AREA
1,000–2,400 sq ft

NOTES
Vermont foundry · cast-iron face · 200
CFM fan

We picked the Montpelier II when the hole should still look like a Vermont stove. Cast-iron face, 56,000 BTU, 20-inch logs, fan standard. Foundry iron in an existing box.

forgenflame.com/products/vermont-castings-montpelier-ii-wood-fireplace-insert

PACIFIC ENERGY

 **MADE IN CANADA**

#4 Neo 2.5 LE2

HEAT
72,000 BTU

EMISSIONS
1.5 g/h

FIREBOX
2.5 cu ft

LOGS
18 in

AREA
existing masonry

NOTES
Contemporary insert · EBT · Duncan, BC

We picked the Neo 2.5 LE2 for a clean contemporary insert from Duncan. Pacific Energy, 2.5 cubic feet, Extended Burn Technology, no catalyst to replace.

www.pacificenergy.net/products/

PACIFIC ENERGY

 **MADE IN CANADA**

#5 Super Insert LE

HEAT
72,000 BTU

EMISSIONS
1.8 g/h

FIREBOX
2.1 cu ft

LOGS
18 in

AREA
existing masonry

NOTES
Super firebox as an insert · catalytic-free ·
Duncan, BC

We picked the Super Insert when they want the PE workhorse in the hole, not on the floor. Same Super LE firebox, 72,000 BTU, catalytic-free, lifetime firebox.

www.pacificenergy.net/products/

TOWN & COUNTRY

 **MADE IN CANADA**

#1 TC36 Arch

HEAT
47,000 BTU

EMISSIONS
—

FIREBOX
941 sq in · barrel arch

LOGS
Design-A-Fire

AREA
living rooms

NOTES
26.8% P.4 · disappearing glass · battery
backup · Duncan, BC

We picked the TC36 Arch because the face is a barrel arch — Rumford proportions — without building a masonry throat. Town & Country, Duncan, 47,000 BTU, disappearing glass, Design-A-Fire logs. Battery backup when the power drops.

townandcountryfireplaces.com/products/tc36-arch/

ORTAL

#2 Wilderness

HEAT
32,163 BTU

EMISSIONS
—

FIREBOX
traditional firelog opening

LOGS
driftwood · valley oak · birch

AREA
living rooms

NOTES
Flame through the logs · 81.4% AFUE ·
cool wall · Israel

We picked the Wilderness because the flame comes up through the logs, the way a wood fire does. Ortal, 32,163 BTU on natural gas, 81.4% AFUE, herringbone or reflective interior, cool wall so a screen can hang above it. Made in Israel. This is the Ortal the electric was built to match.

www.ortalheat.com/fireplaces/wilderness

ARCHGARD

 **MADE IN CANADA**

#3 K■jin 62

HEAT
46,500 BTU

EMISSIONS
—

FIREBOX
60 × 15 in viewing

LOGS
logs or glass

AREA
great rooms

NOTES
59.4% P.4 · model 62-DVTE46CN-1 ·
wall-to-wall flame · Alberta

We picked the K■jin 62 when the wall wants a ribbon, not a traditional opening. Archgard, 46,500 BTU, 60 by 15 inches of flame, logs or reflective glass. Built in Alberta.

archgard.com/products/fireplaces/gas-fireplaces-linear/kojin-62/

PACIFIC ENERGY

 **MADE IN CANADA**

#4 Esprit L44

HEAT
38,000 BTU

EMISSIONS
—

FIREBOX
linear 44 in

LOGS
glass / driftwood / birch

AREA
living rooms

NOTES
38,000 BTU · 65% P.4.1 · Proflame 2 ·
Duncan, BC

We picked the Esprit L44 as the Canadian linear. Pacific Energy, 38,000 BTU, Proflame 2, glass or driftwood, built in Duncan. A Barrie-free linear that is still ours to service.

www.pacificenergy.net/products/esprit-l44-gas-fireplace/

KOZY HEAT

#5 Nordik 60TL

HEAT
40,000 BTU

EMISSIONS
—

FIREBOX
60 in linear

LOGS
glass / logs

AREA
great rooms

NOTES
Coval · 60-inch ribbon · Minnesota-built

We picked the Nordik 60TL for a 60-inch ribbon we can get through Coval. Kozy Heat, 40,000 BTU, Minnesota-built, a linear that still throws heat.

www.kozyheat.com/

PACIFIC ENERGY

 **MADE IN CANADA**

#1 Trenton Classic White Porcelain

HEAT
24,000 BTU

EMISSIONS
—

FIREBOX
340 sq in glass

LOGS
mature fire log set · black porcelain interior

AREA
living rooms

NOTES
Antique White porcelain enamel · 74.4% P.4.1 · Proflame 2 · Duncan, BC

We picked the Trenton Classic in Antique White porcelain. Pacific Energy cast iron, 24,000 BTU, 74.4% P.4.1, doors that swing open over a mature fire log set and black porcelain interior. Dual blowers, Proflame 2, built in Duncan.

www.pacificenergy.net/products/trenton-classic-gas-stove/

ARCHGARD

 **MADE IN CANADA**

#2 Optima 45

HEAT
28,000 BTU

EMISSIONS
—

AREA
cabins and family rooms

FIREBOX
freestanding direct vent

NOTES
Model 45-DVFS28N · 82% steady state · fan included · Alberta

LOGS
ceramic log set

We picked the Optima 45 as the Canadian freestanding gas stove. Archgard, 28,000 BTU, about 82% steady state, fan in the box. A stove for a cabin or a family room.

archgard.com/products/freestanding-stoves-2/

VERMONT CASTINGS

#3 Radiance

HEAT
38,000 BTU

EMISSIONS
—

FIREBOX
23" x 15" in glass · 31" in stove

LOGS
split oak · operable doors

AREA
1,100–1,700 sq ft

NOTES
Vermont foundry · 82% steady state ·
millivolt available

We picked the Radiance as the foundry gas stove. Vermont Castings, 38,000 BTU, operable doors, split oak, 82% steady state. Lights in a blackout. Same Forge & Flame house as Heat & Glo.

forgenflame.com/products/vermont-castings-radiance-direct-vent-gas-stove

VERMONT CASTINGS

#4 Stardance

HEAT
28,000 BTU

EMISSIONS
—

FIREBOX
19 × 16 in glass · 25½ in stove

LOGS
oak · operable doors

AREA
700–1,200 sq ft

NOTES
Vermont foundry · 81% steady state · four finishes

We picked the Stardance when the room does not need the Radiance. Vermont Castings, 28,000 BTU, 25½ inches wide, operable doors. The mid-size foundry gas stove.

forgenflame.com/products/vermont-castings-stardance-direct-vent-gas-stove

VERMONT CASTINGS

#5 Intrepid

HEAT
17,500 BTU

EMISSIONS
—

FIREBOX
16■ × 12■ in glass · 21¾ in stove

LOGS
oak · operable doors

AREA
up to 1,000 sq ft · bunkies

NOTES
Vermont foundry · small cast stove ·
millivolt available

We picked the Intrepid for camps and bunkies. Vermont Castings, 17,500 BTU in a 21¾-inch stove, operable doors. The small foundry gas stove that still looks like iron.

forgenflame.com/products/vermont-castings-intrepid-direct-vent-gas-stove

PACIFIC ENERGY

 **MADE IN CANADA**

#1 Brentwood

HEAT
30,000 BTU

EMISSIONS
—

FIREBOX
large traditional insert

LOGS
log set

AREA
existing masonry

NOTES
30,000 BTU · 75% AFUE · Duncan, BC

We picked the Brentwood as the Canadian gas insert. Pacific Energy, 30,000 BTU, 75% AFUE, a traditional log fire in the hole. Built in Duncan.

www.pacificenergy.net/products/

ARCHGARD

 **MADE IN CANADA**

#2 Chantico 36

HEAT
40,000 BTU

EMISSIONS
—

AREA
wide masonry opening

FIREBOX
clean-face insert

LOGS
HD logs

NOTES
76.95% P.4 · 79.1% steady state · model
36-DVIE40LN · Alberta

We picked the Chantico 36 for a wide masonry hole. Archgard clean-face insert, 40,000 BTU, 76.95% P.4, flame that starts at the hearth. Alberta.

archgard.com/products/inserts/clean-face/chantico-36/

ORTAL

#3 Wilderness Insert 34

HEAT
35,000 BTU

EMISSIONS
—

FIREBOX
29¹³/₁₆ ■■■ × 20³/₁₆ ■■■ in viewing

LOGS
dark brown · chopped wood

AREA
existing masonry

NOTES
IN34 · flame through the logs · interior
light · 3×4 in co-linear · Israel

We picked the Wilderness Insert 34 when a dead masonry hole should get that same flame-through-the-logs fire. Ortal, 35,000 BTU, light inside the box, anti-reflective glass, and it still runs if the power drops. Israel. Not a Canadian insert — the flame is why it is here.

www.ortalheat.com/wilderness-gas-fireplace-inserts

KOZY HEAT

#4 Nordik 34i

HEAT
40,000 BTU

EMISSIONS
—

FIREBOX
arched insert

LOGS
HD logs

AREA
existing masonry

NOTES
70.3% P.4 · mission fronts · Proflame 2 ·
Lakefield, MN

We picked the Nordik 34i when they want an arched mission front in an existing fireplace. Kozy Heat, 40,000 BTU, Proflame 2. Minnesota-built — not Canadian, and we say so.

www.kozyheat.com/

ARCHGARD

 **MADE IN CANADA**

#5 Chantico 27

HEAT
22,400 BTU

EMISSIONS
—

FIREBOX
22 × 13½ in viewing

LOGS
ceramic logs

AREA
small masonry opening

NOTES
70.73% P.4 · model 27-DVIE22N · fan and remote · Alberta

We picked the Chantico 27 when the opening is small and still has to look like a fireplace. Archgard, 22,400 BTU, 22-inch viewing, clean face, fan and remote. The small Canadian insert.

archgard.com/products/inserts/clean-face/chantico-27/

RENAISSANCE

 **MADE IN CANADA**

#1 Rumford 1000

HEAT
high-output wood

EMISSIONS
EPA award · door closed

FIREBOX
Rumford · guillotine

LOGS
cordwood

AREA
great rooms

NOTES
Guillotine door and screen · Saint-Jérôme,
QC · quote

We picked the Rumford 1000 when the room wants a real Rumford, guillotine and all. Renaissance, Saint-Jérôme, an EPA-award fire with a door and a screen. Quote it to the masonry.

icc-rsf.com/fireplace/renaissance/rumford-1000/

ORTAL

#2 Space Creator 150

HEAT
43,715 BTU

EMISSIONS
—

FIREBOX
62" × 16¹¹/₁₆" in · see-through

LOGS
logs · pebbles · glass

AREA
two rooms, one fire

NOTES
Quoted · double glass · cool wall · 77.8%
AFUE · Israel

We picked the Space Creator 150 when one fire has to read from both sides of a pier. Ortal see-through, 62" by 16¹¹/₁₆" inches of glass, 43,715 BTU, double glass so the stone stays cool. Quote the opening. Made in Israel.

www.ortalheat.com/fireplaces/space-creator-150

DON-BAR

 **MADE IN CANADA**

#3 9000 Series

HEAT
4× an open hearth

EMISSIONS
—

FIREBOX
four-sided see-through

LOGS
20 in · wood, gas, or ethanol

AREA
quoted rooms

NOTES
Quebec City · custom hood · quote

We picked the Don-Bar 9000 when the fire has to be seen from four sides. Quebec City, made to the room, wood, gas, or ethanol, 20-inch logs, about four times an open hearth. Quote.

www.don-bar.com/en/foyers-centraux-serie-9000

RENAISSANCE

 **MADE IN CANADA**

#4 Linear 50

HEAT
contemporary wood

EMISSIONS
—

FIREBOX
45■ × 15■ in glass

LOGS
24 in

AREA
modern great rooms

NOTES
Guillotine · heat-recovery ducts ·
Saint-Jérôme, QC · quote

We picked the Linear 50 when contemporary wood still has to be a fireplace, not a stove. Renaissance guillotine, 46-inch glass, 24-inch logs, heat-recovery ducts. Saint-Jérôme. Quote.

icc-rsf.com/fireplace/renaissance/linear-50/

TOWN & COUNTRY

 **MADE IN CANADA**

#5 TC54

HEAT
84,000 BTU

EMISSIONS
—

FIREBOX
50" x 40" in · 2,034 sq in glass

LOGS
Design-A-Fire · birch / diamond / country
home

AREA
great rooms · lodges

NOTES
Quoted · Canadian · disappearing ceramic
glass · battery backup

We picked the TC54 because it is Canadian and the glass disappears. Town & Country, Delta BC — 84,000 BTU, 2,034 square inches, guests think it is an open fire. Lodge scale without a custom masonry box. Quote.

townandcountryfireplaces.com/products/tc54/

DAVINCI

#6 Custom Linear

HEAT
14,500 BTU per foot

EMISSIONS
—

FIREBOX
2–66 ft · 8 configurations

LOGS
birch / crushed glass / rock ember

AREA
quoted to the room

NOTES
Quoted · Safe Touch Glass · Cool Wall ·
modular Titan Lock

We picked DaVinci when the fireplace has no standard size. Built by the foot in Mukilteo — two to 66 feet, eight configurations, Safe Touch glass, finish right to the edge. Quote. Measure twice, crate once.

www.davincifireplace.com/

ORTAL

#1 Holographic 74

HEAT
5,120 BTU

EMISSIONS
none — no chimney

FIREBOX
73.2 × 16 in · 1 / 2 / 3 sided

LOGS
handcrafted 3D logs · dual OLED

AREA
up to 400 sq ft

NOTES
Holographic dual-screen · six flame films ·
app / Alexa · same house as Wilderness

We picked the Holographic 74 because Ortal already lives in this book and this is the electric that finally matches Wilderness. Dual OLED screens throw real flame video onto 3D logs — six films, height and speed on the app. Front, corner, or three-sided. 73 inches of glass, 5,120 BTU, heat-barrier glass, 120 V. No new supplier. No chimney.

www.ortalheat.com/fireplaces/holographic-electric-74

REGENCY

 **MADE IN CANADA**

#2 Onyx EX190

HEAT
5,000 BTU

EMISSIONS
none — no chimney

FIREBOX
76 × 17 in · 1 / 2 / 3 sided

LOGS
split oak · integrated log lighting

AREA
up to 400 sq ft

NOTES
Chromalight Plus · Wi-Fi · made in Delta,
BC

We picked the Onyx EX190 because Regency already lives in this book and Chromalight Plus is the three-sided electric. 76-inch glass, 17 inches tall, oak logs with lighting in the wood. One-, two-, or three-sided bay. 5,000 BTU, app. Same Delta shop that builds the F5200.

www.regency-fire.com/en/Products/Electric/Electric-Fireplaces/EX190

HEAT & GLO

#3 Triton 65

HEAT
5,000–10,000 BTU

EMISSIONS
none — no chimney

FIREBOX
65 × 20 in · 1 / 2 / 3 sided · linkable

LOGS
XL timber logs · black glass · crystals

AREA
up to 800 sq ft on 240 V

NOTES
20 in glass · link units · Wi-Fi · same house as Primo

We picked the Triton 65 for the tallest glass we hang without a new supplier. Heat & Glo — 20-inch viewing, timber logs, one-, two-, or three-sided, and you can link units down a wall. 5,000 BTU on 120 V, 10,000 on 240 V. Same house as the Primo II and the Escape 35.

www.heatnglo.com/fireplaces/electric/built-in/triton

HEAT & GLO

#1 Lanai 48

HEAT
55,000 BTU

EMISSIONS
outdoor — no chimney

FIREBOX
47" × 17 in viewing

LOGS
crushed glass · river rocks · LED

AREA
patio wall

NOTES
Stainless · IntelliFire · 48 / 60 / 72 in ·
same house as Primo

We picked the Lanai 48 for a stainless linear that lives outside. Heat & Glo, 55,000 BTU, crushed glass and LED, 48-inch ribbon. Same house as the Primo II. No chimney.

HEAT & GLO

#2 Twilight II

HEAT
38,000 BTU

EMISSIONS
—

FIREBOX
35" × 21½ in · see-through

LOGS
crushed glass · indoor/outdoor

AREA
great room to patio

NOTES
Indoor/outdoor see-through · IntelliFire ·
36 in

We picked Twilight II when one fire has to read in the living room and on the patio. Heat & Glo see-through, 38,000 BTU, 35" × 21½. Guests see the kitchen from the deck.

REGENCY

 **MADE IN CANADA**

#1 Plateau PTO30

HEAT
50,000 BTU

EMISSIONS
outdoor

FIREBOX
41½ in linear burner

LOGS
crystals / volcanic stone / driftwood

AREA
custom masonry pit

NOTES
50,000 BTU · vent-free burner · Delta, BC
· custom surround

We picked the Plateau when we are building the pit in Masonal, not buying a table. Regency PTO30, 50,000 BTU linear burner, crystals or driftwood, quoted into the stone. Same Delta shop.
